Work

Blockchain Developer at Nevam, London (Remote)

August 2021 — June 2022

A part-time, remote position for a web3 start-up building a social media platform for NFT artists to express themselves via their own created metaverses.

- Planned and created an NFT smart contract using Solidity, Hardhat and OpenZeppelin, wrote extensive tests with Chai, and audited the contract using Mythril.
- Built a decentralized social media web app using React, CSS, Bootstrap, and web3.js / Ethers for integrating Ethereum.
- Learned how to work in an agile team environment, use tools like Confluence, Jira and Bitbucket, able to work autonomously.

Project: LendFi - Peer-to-Peer Lending Platform

A platform for lending and borrowing ETH for NFT collateral (ERC-721).

- Planned out the development and architecture of the application and designed the user interface using Figma.
- Wrote, tested and deployed the smart contract to Rinkeby testnet using Solidity, Hardhat and Chai.
- Built the front-end application with React, TypeScript and Ethers.
